

CREATE YOUR OWN CUSTOM MANAGEMENT TOOLS DIRECTLY FROM YOUR SPREADSHEETS

Tailored solutions for all your business activities

Transform your spreadsheets into business user tools, both web and mobile. Upgrade towards collaborative, reliable, secured and efficient solutions.

Give yourself a broader and more flexible view of your task: create your own tailored tools in a few clicks, benefitting your productivity.

YOUR SPREADSHEET

- **Personal office file, flexible**, easy to use and operate
- **Suited to handle a low data volume**, to be shared with a limited number of peers
- To support **simple and non-critical business processes**

YOUR CUSTOM TOOL

- **Enterprise-grade business tool**, built 100% specific to your needs
- **Intuitive tools, easy to master**, built by and for the business end-user
- **To power the most complex business processes** of your business line
- **Native integration with your existing systems**, for a panoramic 360° view of your business and data
- **Fully adaptable to your business**
- **SaaS hosting**, no setup, no maintenance required

SPREADSHEET LIMITATIONS:

- Lack of a global and multi-dimensional view on your data and processes
- Repetitive, error-prone and time-consuming tasks to integrate, consolidate and maintain your data
- Lack of traceability on origin and evolution of data
- Low reliability and coherence on the data with use and evolution of macros and formulas
- Hard to achieve data consolidation for a large group of collaborators

GENERATIVE OBJECTS

LONG TERM INNOVATION AND COMMITMENT FOR YOUR BUSINESS

OUR TECHNOLOGY

SaaS platform for modeling and generating enterprise-grade management tools (GO applications)

Transformation engine to convert spreadsheets automatically to GO applications

ADAPTABILITY

The **GO platform** empowers you to enrich your tools seamlessly with new modules and features as your business evolves.

CLIENT SERVICE

Our dedicated team are available to provide an agile approach through active listening and iterative deliveries of ever-improving versions of your tool.

“Dominique Pons (Thales, Thales Technical Directorate)

*We have built with **GO XL** a database for all Thales to keep track of all our relations with startups. In a few months' time, we were able to create a tool immediately useful to us and which is proving to be much more advanced than our initial spreadsheet.*

“Jérôme Claudel (Haut Conseil du Commissariat aux Comptes, Information Systems Director)

*Our need was to build a full information system for our business users, from scratch. With **Generative Objects**, we were able to launch the project in a very short timeframe, with very fast concrete results and a first tool in just 3 weeks.*

“Djelloul Belbachir (Astrée nonprofit organization, Director)

*We find in **Generative Objects** a commitment to engage in social projects and an active interest in what we do. With **GO XL**, we now have real time, nationwide visibility of our activity, and a new management tool used by all our volunteers.*
